

# ENVIRONMENTAL Summit

FORT HOOD, TEXAS

ENVIRONMENT

MISSION READINESS

COMMUNITY

Regional Sustainability

## Investing in the future . . .

### ▶ Mission Readiness

Train, mobilize, deploy and sustain ready forces; on order conduct decisive full spectrum joint or combined operations by land, sea and air.

### ▶ Environment

#### Air Quality

Achieve and maintain air that is clean, healthy and breathable, and can sustain military training.

#### Water

Reduce potable water consumption and maintain downstream water quality.

#### Land

Reduce soil erosion, eliminate risk from contaminants, resolve encroachment issues, protect endangered species, mitigate archaeological sites, and promote land management.

### ▶ Community

Fort Hood continues to partner with city/county governments, state/federal regulatory agencies, environmental/civic organizations, educational institutions, private businesses, news media, ranchers/landowners and citizens.

*...Building solutions together*

**FORT HOOD**  
"THE GREAT PLACE"

# Balanced readiness through environmental stewardship

- ▶ Fort Hood and its partners will continue to work together for the safekeeping of our natural and cultural resources by fostering cooperation, sharing information and coordinating 25-year sustainability plans.
- ▶ Fort Hood's infrastructure will continue to be planned, designed, constructed and managed to remain sustainable and secure.
- ▶ The end result will be an installation with training areas that fully support mission requirements while preserving the environment. We can meet the needs of the present without compromising the ability of future generations to meet their own needs.
